

AMAR SHRESTHA

WORK EXPERIENCE

Beyond Apogee
Kathmandu - Nepal
2023 - 2024

During my time as a Content Creator and Robotics Intern, I combined my creative skills with technical expertise to work on various exciting projects. I contributed to creating engaging content while also working on hands-on robotics projects, such as a Bluetooth-controlled light and fan, an automated pet feeder, and a micromouse robot. This experience allowed me to blend innovation with problem-solving, sharpening my technical skills in hardware programming and circuit design while also developing my ability to communicate complex ideas effectively through content creation.
